HAIX® Climate System

The HAIX® Climate system uses the pumping movement, which permits air circulation with every step – moist air is released and fresh air comes in through the vent holes at the top of the boot.

HAIX® Lacing System

The patented, externally positioned shoe band with inner-lying crossovers reduces danger of hooking.

HAIX® HD Cap System

Specially developed profiled rubber toe cap for long lasting durability.

HAIX® MSL System

MicroSoftLight: Improved damping, extremely low weight due to the PU foam across the entire sole area, good cold/heat insulation.

Sun Reflect

Reduces the heating effect of the upper leather by direct sunlight. Sunlight is reflected by the leather, keeping the leather and the feet cooler.
